TUFF BOARD
SMART ROOF SOLUTION

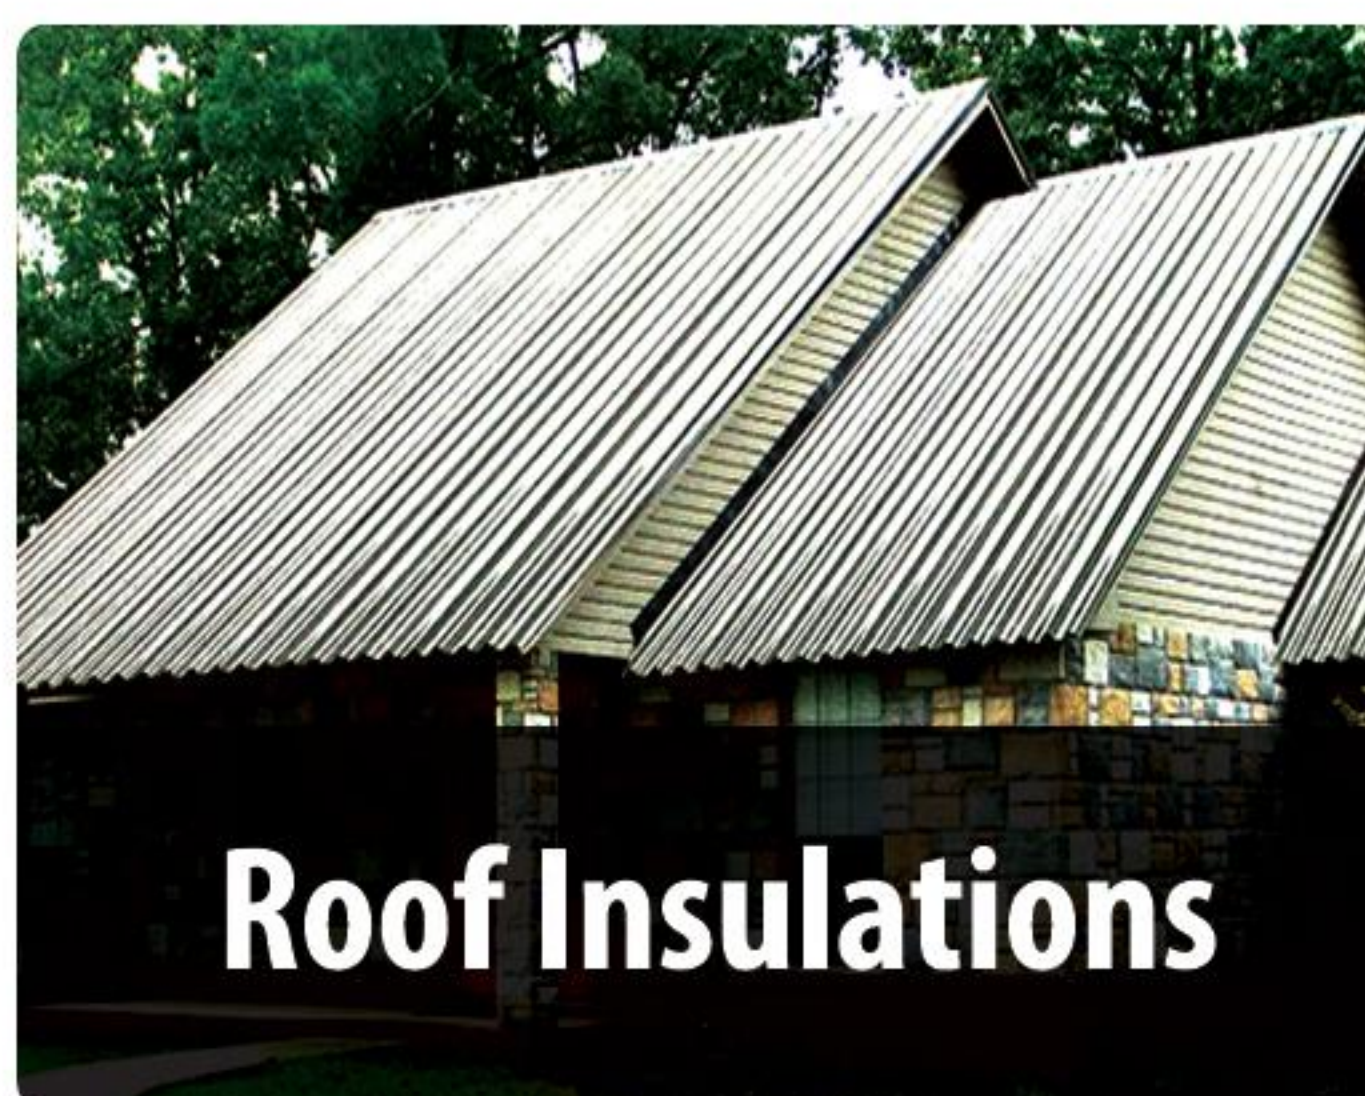

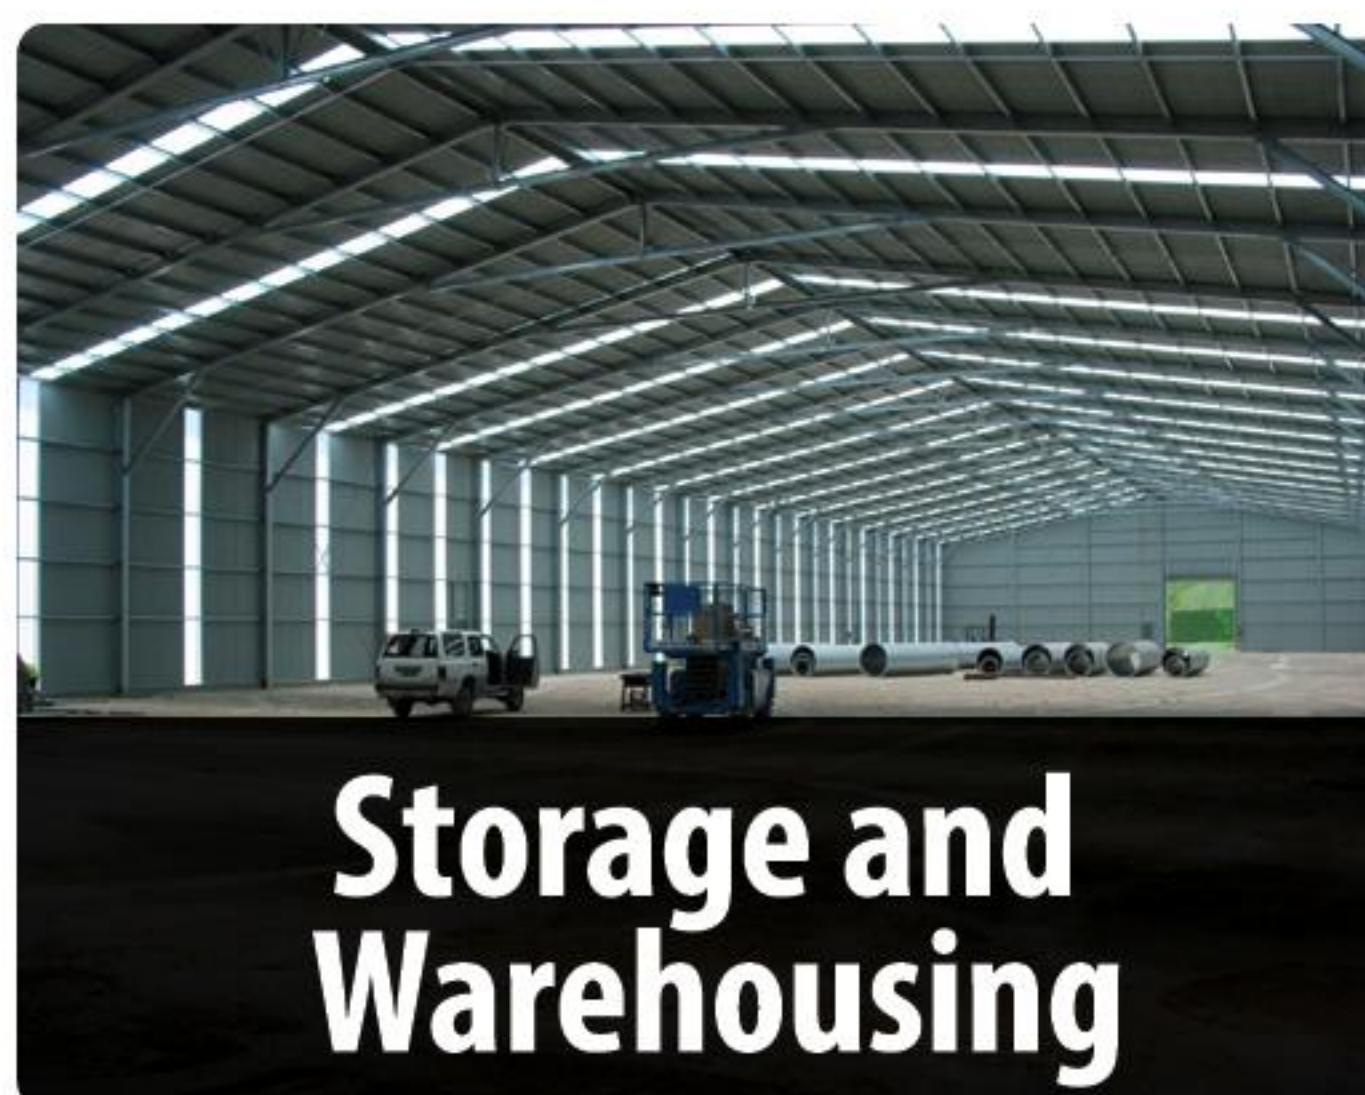

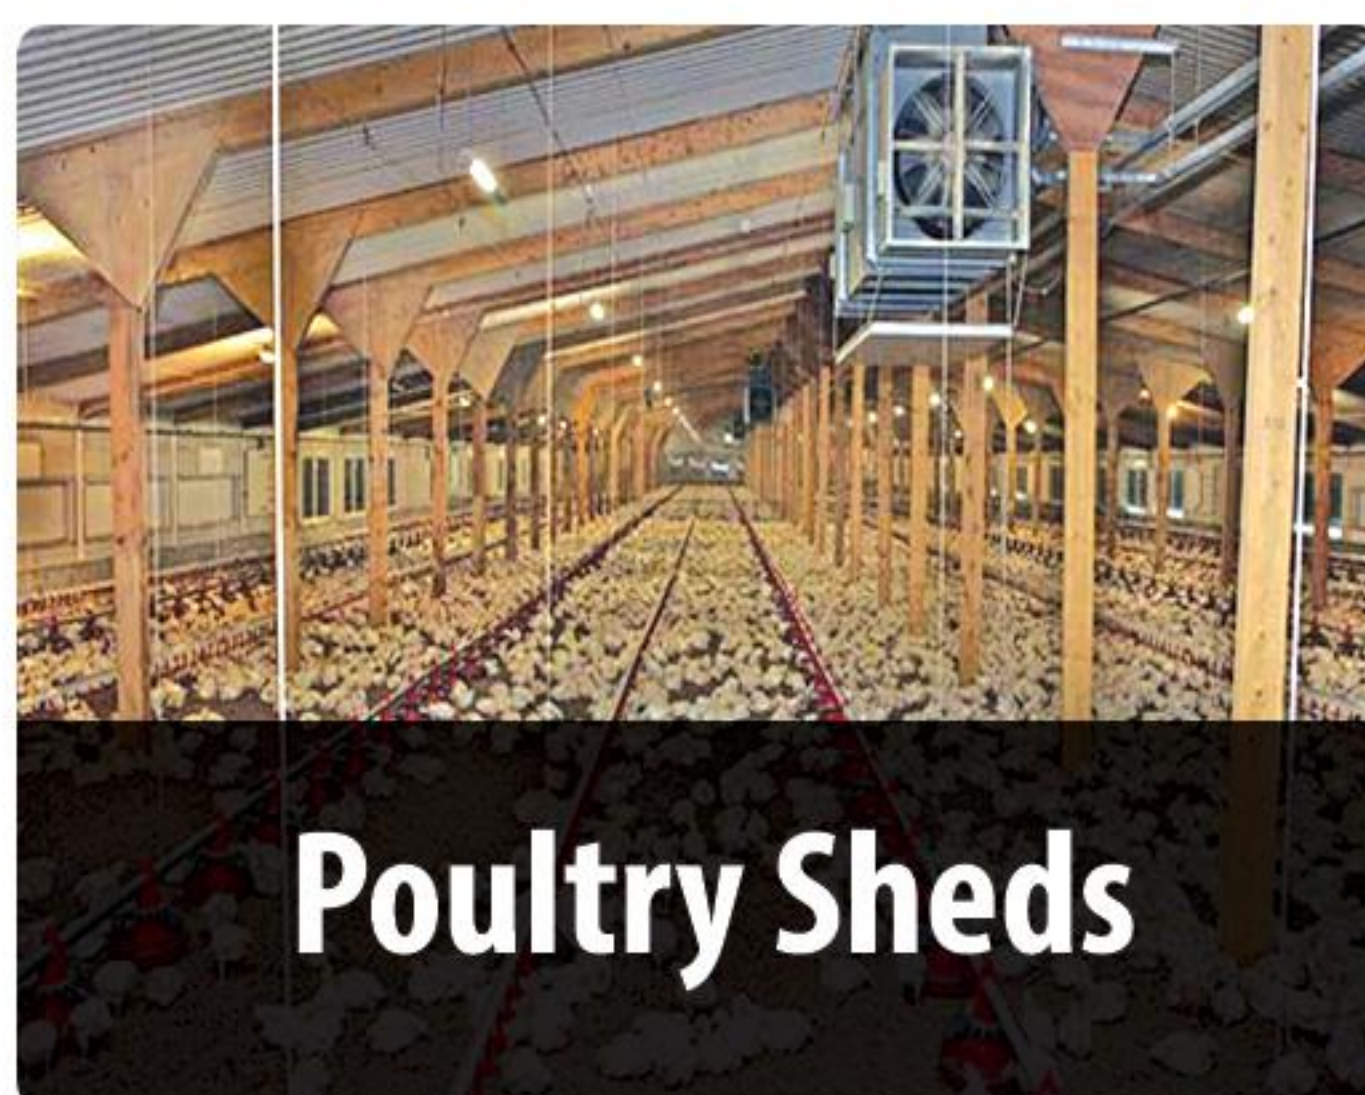

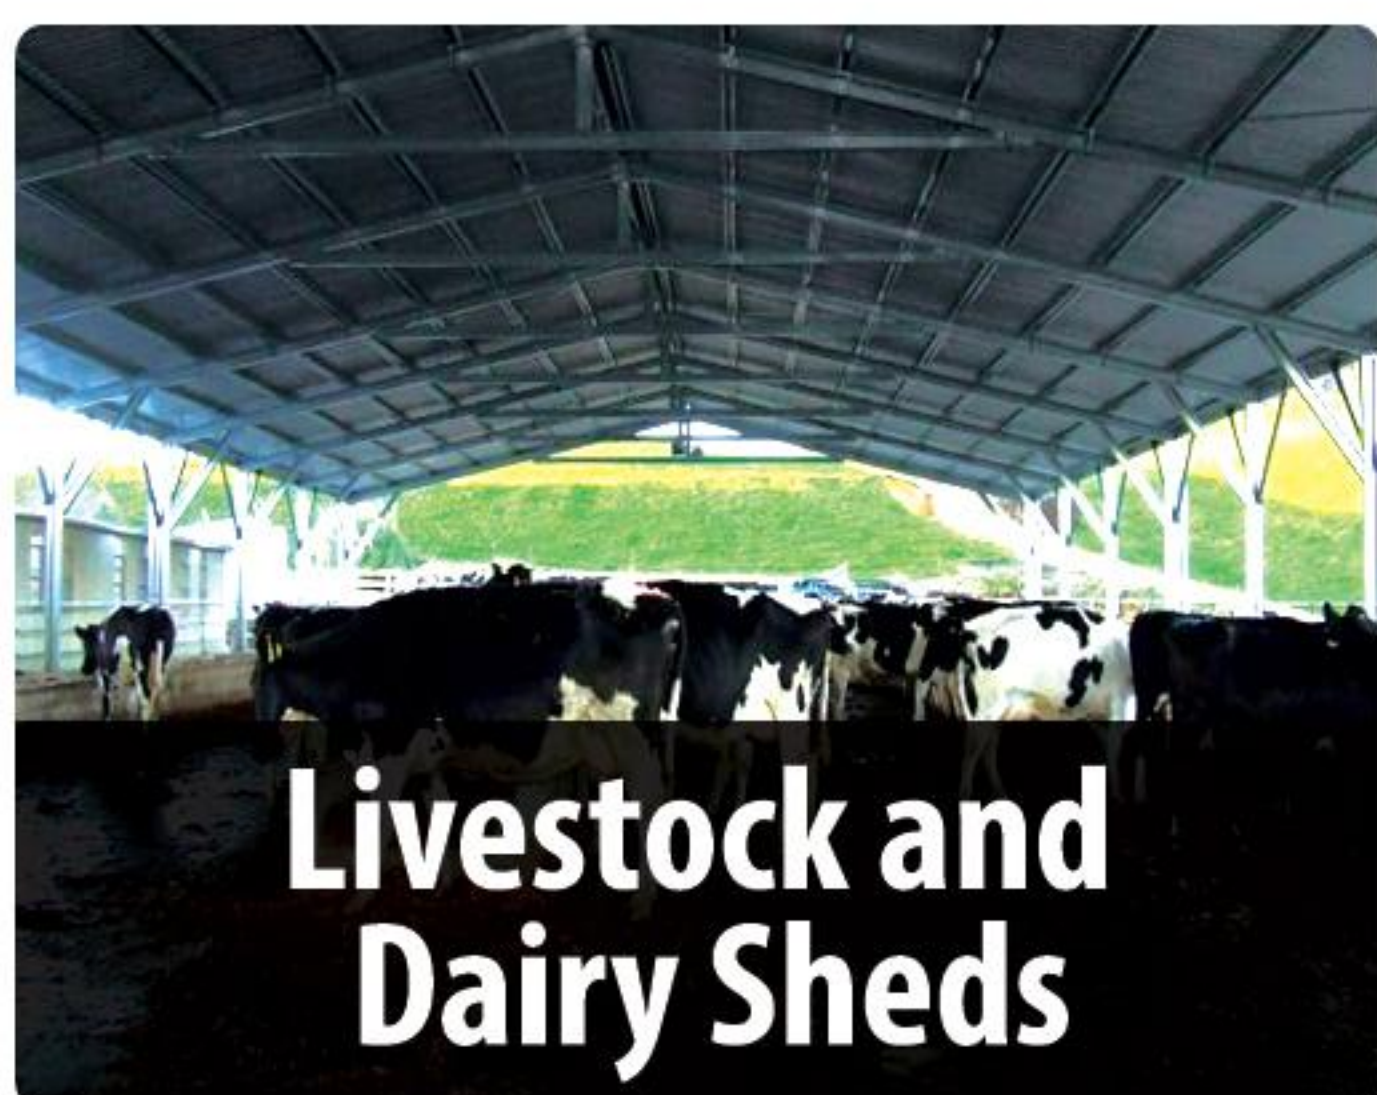

www.greenearthrecycling.com

Tuff Board

Green Earth Tuff Board is typically amongst the least expensive type of shed construction, which includes metal and asbestos sheets. Not only are they not harmful to health like asbestos sheets but also require no maintenance and are weather and water proof. While metal sheets over time rust and corrode and require regular coats of paint, Green Earth Tuff Boards require no such upkeep. Furthermore, Tuff Boards are an ideal product for places where the temperatures are extreme, due to its insulation value. In the hot summers it keeps the shed naturally cool.

APPLICATIONS

..... And many other Roofing and Wall Applications

ADVANTAGES OF GREEN EARTH TUFF BOARD

Strong

Extremely tough and have a long life. Do not crack, break or chip off like cement and asbestos sheets.

Cost Effective

Cheaper and lighter than other sheets.

Water Proof

Do not absorb any water and are rust proof.

Easy Installation

Can be nailed, screwed, punched, stapled and stitched without cracking.

Insulation

Do not radiate heat and protect from the heat in summers and cold in winters

Fire Resistant

They are fire retardant.

ECO Friendly

Environment friendly and have no chemicals in it. They are Termite proof, fungus proof and remain clean.

Illumination

Excellent illumination- Results in lower energy cost.
